**Question: 1**

Would you like to receive emails about Cisco training, certifications, services, special offerings, and events?

- A - Yes
- B - No

**Question: 2**

Which service component within the plan phase prescribes a set of activities and tasks to assess existing network infrastructure and applications to verify their ability to support the proposed routing and switching solution for a customer?

- A - Deployment Project Management
- B - Operations Readiness Assessment
- C - Security Vulnerability Assessment
- D - Site Readiness Assessment
- E - Network Readiness Assessment

**Answer: E**

**Question: 3**

Which three activities within the plan phase are performed when assessing network vulnerabilities and identifying steps needed to address security' threats and attacks? (Choose three.)

- A - Produce network security specifications and requirements.
- B - Identify, analyze, and document existing network vulnerabilities.
- C - Produce security vulnerability report.
- D - Assess current network infrastructure and network security procedures.
- E - Document the existing network environment.
- F - Document the network vulnerabilities and determine the level of criticality for remediation.

**Answer: B, C, E**

**Question: 4**

What are two typical activities that are conducted as part of Security Assessment? (Choose two.)

- A - Perform intrusion audits.
- B - Assess network infrastructure software and configurations.
- C - Create a performance baseline for Security Assessment.
- D - Categorize security incidents.

**Answer: A, C**

**Question: 5**

Which task is conducted as part of Business Readiness Testing?

- A - Identify, select, and assess network management tools, features, and functionality.
- B - Obtain and review security procedures and policies.
- C - Use predetermined use cases or design use cases based upon validated business and operational requirements.
- D - Review network implementation strategy.

**Answer: C**

**Question: 6**

Which two items on the design discovery checklist are used to create a low-level design?  
(Choose two.)

- A - technical requirements
- B - capacity planning
- C - design goals
- D - WAN modeling

**Answer: A, C**

**Question: 7**

Which task is performed during the Systems Monitoring service component in the operate phase?

- A - Test system connectivity.
- B - Populate and maintain configuration management database.
- C - Manage passwords, rights, and permissions.
- D - Collect performance data for reporting, such as CPU, memory, storage, licenses and port utilization, and availability data.
- E - Update security signatures.

**Answer: D**

**Question: 8**

Which three resources are used to support physical and logical design documentation of the operations and network management system? (Choose three.)

- A - verification results
- B - design templates
- C - standards
- D - operation policies

**Answer: B, C, D**

**Question: 9**

Which three tasks are conducted as part of the Implementation Plan Development service component? (Choose three.)

- A - Discuss network implementation schedules.
- B - Define testing requirements.
- C - Verify site contacts, locations, and other project considerations.
- D - Identify implementation risks.

**Answer: A, C, D**
